Cybersecurity Services Company Gigit Finalizes Second Merger

Company strengthens its foothold in emerging CMMC federal compliance security standards with stock, IP, and assets merger deal with Peak InfoSec

Boulder, CO (January 22, 2021) – Gigit, Inc. (<https://gigitsecurity.com>), a cybersecurity firm that ensures cybersecurity compliance and reduces cybersecurity risk through its testing, assessment, and consulting services, today announces the formal merger of Peak InfoSec (<https://peakinfosec.com>), an Information Security consulting firm and turnaround specialists, into its company. Peak InfoSec will act as a wholly-owned subsidiary of Gigit, providing Cybersecurity Maturity Model Certification (CMMC) Third-Party Assessor Organization (C3PAO) conformity assessments to Gigit’s clients that are part of the Defense Industrial Base. This is the second merger Gigit will have completed, having previously acquired Cyber51, a greatly-regarded cybersecurity company with a focus on network & web application vulnerability assessments, penetration testing (“pentesting”), and cybersecurity training. With this latest merger, Peak InfoSec founder and highly-certified cybersecurity expert, Matthew Titcombe, steps into the role of Chief Security Information Officer (CISO) at Gigit. Gigit, which among its specializations itself offers cybersecurity due diligence services in the mergers and acquisitions space, furthers its ability to serve mid-market (Interim Healthcare) and large (Uber) clients heavily involved in M&A as well as federal government contracting work.

“From a strategic point of view, this acquisition strongly positions Gigit to serve the Department of Defense space,” said Gigit CEO David Jacobs. “Matt Titcombe is on the cutting edge of the CMMC DoD requirements, which will soon expand throughout the federal government sector, so we are thrilled to have

Matt join us as our CISO. The combination of Peak InfoSec's assets and Matt's talent and intellectual property give us long term stability within the FED community."

"Merging with Gigit is a natural fit. With the tidal wave of CMMC work coming our way, the Gigit/Peak InfoSec merger will bring more resources to Defense contractors and ready them for Conformity Assessments," said Titcombe. "My transition to Gigit CISO now allows me to focus exclusively on Information Security consulting and formal cybersecurity assessment services."

###

About Gigit

Gigit, Inc. (<https://gigitsecurity.com>) has been providing cybersecurity services for over 10 years, long enough to witness the exponential growth in the most egregious corporate cybercrimes. With more threats created by remote and globally distributed workforces, Gigit has helped businesses and federal contractors identify and remediate cybersecurity vulnerabilities. Its team of expert, highly certified professionals (CISSP; OSCE; OSCP; CEH; GXPN), with over 100 combined years of cybersecurity experience among them, lead M&A Security Assessments, Pentesting, Industry, Government, and Data Privacy Compliance initiatives and consulting/advisory services. We work directly with CEOs, CISOs, CFOs, CIOs as well as investment banks, insurance companies, VCs, and M&A attorneys to help protect cybersecurity systems and identify breaches that may impact acquisition deals and the ability of companies to do business with government agencies. Among the beneficiaries of Gigit's services are brands like Uber, Amazon, Walmart, Kohl's, Equinix, and Interim Healthcare.

About Peak InfoSec

Founded in 2015 to leverage Matthew Titcombe's 25+ years of Information Security & Technology experience serving the Department of Defense to the commercial sector, Peak InfoSec LLC (<https://peakinfosec.com>) specializes in Information Security Turnaround. The firm is also one of the first 20

new Cybersecurity Maturity Model Certification (CMMC) Third-Party Assessing Organizations (C3PAO) supporting the global Defense Industrial Base. Peak InfoSec has provided consulting services to such global organizations as United Launch Alliance, Sony, ConocoPhillips, Munich Re-Insurance, Nutanix, Toyota Research Institute, and Uber.
